**Propuu, Design from wood.**  
*Lahti, Suomi, 2020*  
**Aalto design competition, Puzzle**  
*Habitare, Helsinki, Suomi 2018*

I am Atso Kurri and I have finished my studies of interior architecture and furniture design in Xamk, Kouvola 2022. I have a good "can do" attitude and passion for long lasting design solutions. I want to bring joy and aesthetical experiences to the built environment with my design work. My style stems from joy of craftsmanship and a comfortable simplicity. I am inspired by traditional design but I want to bring new innovation and ways to use material into my work too.

## Studies

I am 31 years old and graduated in spring 2022 from Xamk, university of applied sciences. My degree is interiorarchitecture and furniture design. I have took part to various design competitions. In 2024 Habitare Protos my Olavi.2 chair was selected as part of the curated exhibition. In the annual Habitare design competition in 2018 my and my competition partner Ulla Pönni gained honorary mention for our competition work DIGIT.

I have completed wood artisan degree from Omnia, Espoo, 2017. I have worked as chairman of board in Virta, organisation of culture students. With Virta we have arranged various design shows physical -and digital form. We have also arranged smaller events such as drink and draw.

## Work experience

**1.8-30.8.2024** I did a intership for Suomen Yrittäjäopisto after learning CAD skills. I did this internship with Mottowasabi design studio. I created furniture models with different variations for different clients with Rhino.

**12.1-2.2.2023** During winter 2023 I was working on a spatial design for an office in IdaDesign Oy. This work included CAD-drawing and planning. I also made furniture selections. This was a project work.

**29.3.-29.6.2021** During summer 2021 I made an internship for IdaDesign Oy. During the internship I finished drafts with Autocad. I also did fixed furniture designs and visualizations with Archicad and Rhino. In addition, I selected furniture for client projects.

**7.5.-21.8.2019** During summer 2019 I was in internship in Studio Ripatti. Studio Ripatti is a Helsinki based furniture design studio. My task was to do various furniture designs with Rhino. Mostly I made models for furniture but we also analyzed furnitures. I learned a lot about design process. Ofcourse following the work as designer entrepreneur was important learning experience too.
