

Roosa Tervapuro

Designer, Freelancer artist

ABOUT

I'm a second year design university student from Finland, with bold visions and a wide skill set in design and visualization.

I'm fascinated by the sustainable future, and how to make better choices in design. I also share interest in innovations and in the business field.

Past work colleagues have described me as a passionate and easy to come with person with a big heart. I gladly step out of my comfort zone and accept new challenges.
